

Standard & DALI PIR Sensor

Remote Programming PIR Sensor

brightLED
...BRIGHTENING YOUR FUTURE

Overview

A remote programmable PIR Sensor for office, classroom and commercial interior spaces where on/off or DALI control is required in small groups. Designed with a low profile for aesthetically demanding architectural projects whilst retaining the functionality expected of the latest lighting controls. Control to the light fixtures is provided via self-powered DALI communication (up to 40 drivers) or a switched output. Set-up of the sensor is carried out using a remote control handset with program memory allowing one-key commissioning where common settings are used for multiple devices.

Features

- On/off version with manual switched input for override
- DALI version (onboard power up to 40 devices)
- Intelligent photocell for daylight detection (daylight harvesting on DALI version)
- Remote setting with IR controller
- Memory function for fast programming
- Recessed or surface mount options
- 5-year warranty
- Plug-in connectors
